

ASBESTOS AWARENESS SIGNAGE ON ARROW III RAIL CARS

1

NJ TRANSIT is in the process of installing asbestos warning labels (see below) inside the door panels of the Arrow III rail cars. As noted previously, non-friable asbestos is present in many of these door panels as insulation and fireproofing. Non-friable asbestos is defined as asbestos that is not easily crushed or pulverized. It is not a problem if it is not disturbed.

QUESTIONS

If you have questions regarding the information in this advisory, please contact one of the following NJ TRANSIT Energy, Environment and Sustainability or Office of System Safety personnel.
